

Alma Launches Special Graduation Tracking Feature to Streamline Student Outcomes and Track Real Time Graduation Progress

Alma's newest feature creates and monitors an unlimited number of graduation plans and personalized student pathways through its comprehensive SIS.

PORTLAND, Ore. (April 14, 2020) – Alma Technologies is excited to announce the addition of Graduation Tracking to its award-winning, comprehensive student information system platform. Alma's new Graduation Tracking feature helps create highly-flexible, completely customized graduation plans calibrated to meet school and state requirements.

Aimed at improving student achievement, and preventing and eliminating transcript errors, Alma Graduation Tracking feature is ready to implement for the 2020 school year. The new Graduation Tracking tool provides transparency among students and parents and empowers Guidance Counselors to do what they do best - engage in conversations with students about their future aspirations. School staff, parents and teachers can generate real time progress reports and drastically cut down on administrative hours allowing them to focus on propelling students to and through their next academic challenge.

"Alma celebrates student progress and school achievement through our new streamlined graduation tracking feature. For our customers, reaching their high school graduation milestone is both a challenge and a pivotal moment; Alma is proud to provide enhanced tools all schools can use to identify and improve gaps in graduation data and rates," says Andrew Herman, CEO and Founder of Alma. "Alma is a visionary company, committed to supporting evolving K-12 education. Our software has proven easy to learn and utilize for users at any technology skills level, which means teachers can spend more of their time teaching and interacting with students and less time dealing with tedious administrative tasks."

The newly designed Graduation Tracking feature is infinitely customizable and adaptable to meet district and state reporting requirements both online and in the classroom.

"With automated reports and easy access to student data, Graduation Tracking eliminates the need for manual entry and saves teachers and staff hundreds and hundreds of hours of work." says Alma Product Manager, Kevin Flynn.

Users have one convenient place to access reliable student and class information throughout the school year. From the convenience of your palm, view accurate student progress, assess course requirements and prevent transcription errors in the mobile-friendly parent and student portal.

Alma's easy setup and user-friendly access to student data helps Guidance Counselors monitor and gain control of students' overall advancement on the road to earning a high school diploma. Additionally, the new graduation tracking report builder allows schools to export student level data by graduation plan to analyze trends and patterns and identify strategic interventions.

Alma's newest tracking feature meets districts, schools and educators where they are at and provides support to help take them where they are going. With automated tracking, the new Graduation feature allows users to accurately benchmark and analyze their students performance and highlight school and district improvements. Alma is dedicated to competency based learning and personalized learning as long-term best practices.
